Binni Cordova

Senior Software Engineer | Expo, React Native, TypeScript, AWS Serverless
Open to relocation | +1 650 374 4225 | binni.2000.cordova@gmail.com
binnicordova.com | linkedin.com/in/binnicordova | github.com/binnicordova

SUMMARY OF QUALIFICATIONS

- Senior Software Engineer with 8+ years building production React Native, TypeScript, and AWS serverless software, with native Swift and Kotlin modules, across five industries, five countries, and four languages.
- Builds products from zero: helped take Itaú's ITU app to 50,000+ downloads and Platanitos to 500,000+, and took Coca-Cola's offline ordering from zero to 500+ orders a month.
- Delivers at scale: 1,350,000+ orders a month for 1,500+ field sellers on unreliable connections, millions of NFL+ viewers on mobile, web, and smart TVs, and secure banking workflows for 100,000+ users.
- Owns delivery end to end: proposes designs and refines them with a software architect, implements serverless AWS services and offline-first clients, reviews code, owns store releases, and has mentored engineers.
- Ships independently and with AI: 13 apps through the App Store and Play Store publishing lifecycle, each built solo with AI in under 4 weeks; 9 open-source npm packages; and a supervised multi-agent system that automated support tasks and took Jira tickets to release.

PROFESSIONAL EXPERIENCE

The Coca-Cola Company USA
Senior Full-Stack Software Engineer Apr 2025 - Sep 2026

miMarket, a B2B field-sales platform: 1,500+ sellers across Peru, Chile, Argentina, Paraguay, and Brazil place 1,350,000+ orders a month to Coca-Cola clients, on unreliable connections and in three languages.

- Rebuilt the React Native platform into an offline-first architecture on a SQLCipher encrypted SQLite database, keeping the legacy app running so sellers never stopped working.
- Took offline ordering from zero to 500+ orders a month after the September 2026 production release, with 10% of sellers on the new app and adoption still growing.
- Automated the support team's tasks with a Claude multi-agent system, moving that time to development and to building the product.
- Configured a supervised multi-agent system (Multica.ai, Paperclip.ing) on the Claude Agent SDK that took Jira tickets and released app changes to their definitions, each signed off by the accountable engineer.
- Built Swift and Kotlin modules (Expo Modules, Turbo Modules) for biometrics, encrypted storage, and hardware.
- Proposed and implemented serverless microservices on AWS (Lambda, API Gateway, DynamoDB, SNS/SQS), refining designs with a software architect to sharpen service boundaries and speed delivery.
- Served as code reviewer and promoted engineering best practices to maintain release quality across five markets.

NFL+ CTV USA
Senior Software Engineer Feb 2024 - Mar 2025

NFL+, the league's streaming service: one React Native and TheoPlayer video player across mobile, web, and smart TVs, in English, Spanish, and French; the NFL app grew from 50M+ to 100M+ downloads during his time.

- Built a native Android module for the Fire TV app that adds the NFL+ catalog to the device's home screen.
- Stabilized the video player component, then optimized rendering, asset loading, and JavaScript-to-native bridge traffic to cut startup time and memory use.
- Refactored atomic state management from deprecated Recoil to Jotai, and migrated React Native CLI native modules to Expo inside a monorepo.

Itaú Bank - ITU App Chile
Software Engineer Dec 2021 - Feb 2024

ITU, Itaú's digital current-account app: a transaction-critical mobile banking platform serving 100,000+ users in Spanish and Portuguese across the bank's Latin American footprint.

- Joined at the start and helped build the ITU app: zero to 50,000+ downloads by Feb 2024 (100,000+ today).
- Engineered biometric authentication and encrypted financial transaction workflows at the app's security layer.
- Sustained 90%+ automated test coverage with Jest and Appium across unit, integration, and end-to-end suites.
- Owned App Store and Google Play releases (TestFlight, App Store Connect) on Bitrise and Jenkins CI/CD pipelines.
- Mentored new engineers on the app's codebase, code review, and release process.

Platanitos APPs Peru
Full-Stack Software Engineer Mar 2019 - Dec 2021

Platanitos, Peru's leading fashion and footwear e-commerce platform, trading across more than one Latin American market.

- Led a team of three developers through the migration from a legacy web platform to React Native and Expo, shipping one codebase to iOS, Android, and Huawei devices.
- Grew the new commerce app from zero to 500,000+ downloads by Dec 2021 (1,000,000 today).
- Owned releases to the App Store, Google Play, and Huawei's store, and mentored the team in React Native.
- Implemented end-to-end shopping, payments, product search, push notifications, and authentication with Mercado Pago, Algolia, Firebase, and Firestore on Google Cloud Platform.

Gruppo GPI - NGH Healthcare System Italy / Germany
Software Engineer Mar 2018 - Mar 2019

GPI Group, an Italian healthcare technology group; NGH, its healthcare information system for medical reporting and annotation, deployed across 3,000+ hospitals and clinics in Europe.

- Implemented 500+ forms for patients' hospital records used by doctors, in a system that started with none, built with Angular 2, Bootstrap, and SQL.
- Built medical reporting and annotation systems for clinical documentation and review.
- Implemented JasperReports document generation with cross-functional engineering teams in Italy and Germany.

EDUCATION

TECSUP Peru
Certificate, Software Architecture Apr 2025 - Nov 2025

Instituto Tecnológico Trentino Juan Pablo II Peru
Bachelor's Degree, Computer Science Mar 2013 - Dec 2015

INDEPENDENT PRODUCTS & OPEN SOURCE

play.google.com/store/apps/developer?id=BinniCordova.com 13 apps, 1,000+ installs/month
apps.apple.com/us/iphone/search?term=BinniCordova.com

Thirteen React Native and Expo apps for iOS and Android (several also on web), each built alone with Claude Sonnet 5.5, Opus 5.5, and OpenAI Terra; releases automated with CI/CD and EAS over-the-air updates.

npmjs.com/~binnizenobiocordovaleandro 9 packages, MIT, 1,600+ downloads in 30 days

- **react-native-check-biometric-changed** - Detects changed biometric enrolment on iOS and Android so an app can revoke a session before a new face or fingerprint inherits it. Swift and Kotlin, zero dependencies; 1,900+ downloads.
- **expo-go-boilerplate** - Starter for Expo and React Native apps with Expo Router, Jotai, Storybook, Jest, Biome, EAS builds and updates, and built-in AI agent skills. One codebase for iOS, Android, web, and TV.
- **expo-feedback-ai** - In-app feature-request board for Expo apps: users vote and an AI agent builds the top idea.
- **Also published:** expo-atoms (state management), expo-orbs (AI loading indicators), expo-logs (file logger), expo-useanimations, iphone-duo-expo-rn.

SKILLS

Mobile & Front-End: Expo (managed and bare), React Native, Expo Modules, Turbo Modules, react-native-vision-camera frame processors, offline-first, SQLCipher SQLite; state management with Redux, Zustand, Jotai, Recoil; Angular, Bootstrap

Programming Languages: TypeScript, JavaScript, Swift, Kotlin, SQL

Cloud & Back-End: AWS (Lambda, API Gateway with REST and GraphQL, DynamoDB, S3, SNS, SQS, Cognito, KMS, CloudWatch); serverless, multi-account microservices; Node.js; Google Cloud Platform (Firestore); Firebase; WebSockets

DevOps & CI/CD: GitHub Actions, EAS Update (over-the-air), Bitrise, Jenkins, TestFlight, App Store Connect

Testing, Security & Observability: Jest, Appium; secure storage (Keychain/Keystore), biometrics

AI & Agentic Engineering: Claude Code, Claude Agent SDK, multi-agent orchestration, prompt engineering, spec-driven development, Multica.ai, Paperclip.ing, LangChain, LangGraph, LLM integration, on-device AI (TensorFlow Lite)

Practices: Agile delivery, Jira, design reviews, code review, mentoring, release ownership, documentation

Languages: Spanish (Native), English (Advanced), Italian (Fluent), French (Basic), German (Basic)
