

Binni Cordova

Senior Forward Deployed Engineer | Senior Software Engineer
Lima, Peru (relocating to Canada) | +51 971 581 847 | binni.2000.cordova@gmail.com
binnicordova.com | linkedin.com/in/binnicordova | github.com/binnicordova

SUMMARY OF QUALIFICATIONS

- Eight years architecting, shipping, and maintaining production software across five industries (healthcare, e-commerce, banking, streaming media, and consumer-goods field sales) and five countries.
- Delivers multinational, multilingual platforms end to end; every product shipped has run in two or more of Spanish, Portuguese, English, and French across Latin America, the United States, and Europe.
- Operates at field scale under real constraints: a B2B ordering platform on AWS and Node.js carrying 1,350,000+ orders a month for 1,500+ sellers on unreliable connections, and secure banking workflows for 100,000+ users.
- Ships alone, end to end, and fast: thirteen self-published cross-platform products on iOS, Android, and web, each taken from empty repository to public release solo in under 90 days.
- Practices AI-native engineering: configures and supervises a LangGraph and Claude Agent SDK multi-agent system in production, and publishes MIT-licensed React Native and Expo packages installed ~500 times a month on npm.

PROFESSIONAL EXPERIENCE

The Coca-Cola Company

Senior Full Stack Software Engineer

USA

Apr 2025 - Present

miMarket, a B2B field-sales platform: 1,500+ sellers across Peru, Chile, Argentina, Paraguay, and Brazil place 1,350,000+ orders a month to Coca-Cola clients, on unreliable connections and in three languages.

- Architect the platform as event-driven serverless microservices on AWS, using Lambda (JavaScript and Python), API Gateway, DynamoDB, S3, SNS/SQS, Cognito, and KMS behind a Backend-for-Frontend layer, sharpening service boundaries and speeding feature delivery.
- Redesigned the React Native platform into an offline-first architecture on WatermelonDB, sustaining order capture and conflict resolution for 1,500+ sellers working where connectivity drops.
- Configure and operate a multi-agent AI system (Multica.ai) on LangGraph and the Claude Agent SDK that picks up and resolves front-end and back-end tickets, reviewing and signing off every change as the accountable engineer.
- Automated pull-request creation across multi-environment, multi-account AWS microservices, removing manual release overhead from every deployment.
- Build native iOS (Swift) and Android (Kotlin/Java) modules for biometrics, encrypted storage, and hardware integrations beyond the JavaScript bridge.
- Mentor engineers, lead architecture reviews, and partner with Product, Design, QA, and executive stakeholders to hold release quality across five markets.

NFL+ CTV

Senior Software Engineer

USA

Feb 2024 - Mar 2025

NFL+, the league's streaming service: one React Native and TheoPlayer video player delivered to millions of viewers across mobile, web, and smart TVs, in English, Spanish, and French.

- Improved playback controls, performance, cross-platform compatibility, and stability across every device target.
- Profiled rendering bottlenecks with Datadog, then optimized rendering pipelines, asset loading, and JavaScript-to-native bridge traffic to cut startup time and memory consumption.
- Refactored state management from deprecated Recoil to Jotai across the player codebase, retiring an unmaintained dependency from a live streaming product.
- Migrated legacy React Native CLI native modules to Expo-compatible modules inside a Turborepo monorepo, simplifying the build and native dependency pipeline.

Itaú Bank - ITU App

Software Engineer

Chile

Dec 2021 - Feb 2024

ITU, Itaú's digital current-account app: a transaction-critical mobile banking platform serving 100,000+ users in Spanish and Portuguese across the bank's Latin American footprint.

- Engineered biometric authentication and encrypted financial transaction workflows at the app's security layer.
- Sustained 90%+ automated test coverage with Jest, Detox, and Appium across unit, integration, and end-to-end suites on the SQL-backed codebase, tracked through JIRA.

- Developed reusable Swift and Kotlin/Java native modules for authentication, secure storage, and core banking features.
- Strengthened Bitrise and Jenkins CI/CD pipelines, reducing deployment risk and improving release consistency.

Platanitos APPs

Peru

Full Stack Software Engineer

Mar 2019 - Dec 2021

Platanitos, Peru's leading fashion and footwear e-commerce platform, trading across more than one Latin American market.

- Led the migration from a legacy web platform to React Native and Expo, shipping a single codebase to iOS, Android, and Huawei devices.
- Delivered a cross-platform commerce application that surpassed 1,000,000 downloads.
- Implemented end-to-end shopping, payments, product search, push notifications, and authentication with Mercado Pago, Algolia, Firebase, and Firestore on Google Cloud Platform.

Gruppo GPI - NGH Healthcare System

Italy / Germany

Software Engineer

Mar 2018 - Mar 2019

NGH, a healthcare information system: medical reporting and annotation deployed across 3,000+ hospitals and clinics in Europe.

- Built medical reporting and annotation systems for clinical documentation and review.
- Implemented Jasper Reports document generation, collaborating with cross-functional engineering teams in Italy and Germany.

EDUCATION

TECSUP

Peru

Certification, Software Architecture

Apr 2025 - Nov 2025

Instituto Tecnológico Trentino Juan Pablo II

Peru

Bachelor's Degree, Computer Science

Mar 2013 - Dec 2015

INDEPENDENT PRODUCTS & OPEN SOURCE

play.google.com/store/apps/developer?id=BinniCordova.com

13 apps, 1,000+ installs/month

Thirteen cross-platform products on React Native and Expo (SDK 57+), each designed, built, submitted, and launched alone: one codebase to iOS, Android, and in several cases the web. Several ship AI features.

npmjs.com/~binnizenobiocordovaleandro

MIT, ~500 installs/month

- **react-native-check-biometric-changed** - Detects when a device's biometric enrolment has changed on iOS and Android, letting an app revoke a session before a newly enrolled face or fingerprint inherits it. Zero runtime dependencies; past 1,000 installs.
- **expo-feedback-ai** - In-app feature-request board for Expo apps whose most-voted ideas are picked up and built by an AI agent. No backend, API key, or configuration required; runs in Expo Go.
- **iphone-duo-expo-rn** - Frosted-glass "fold" interaction driven by device motion, for any Expo app. TypeScript only, no native code; runs on iOS, Android, and web.

SKILLS

Languages & Mobile: TypeScript, JavaScript, Swift, Kotlin/Java, Python, SQL; React Native, Expo (Managed & Bare), Native Modules, React Native New Architecture (JSI, TurboModules, Fabric), WatermelonDB, Offline-First Architecture; Redux, Zustand, Jotai, Recoil

AI & Agent Frameworks: Claude Code, Claude Agent SDK, LangGraph, Codex/Codex CLI, Cursor, multi-agent orchestration, AI-assisted diagnostics, prompt engineering, Spec-Driven Development, LLM integration, On-Device AI (TensorFlow Lite)

Cloud & Backend: AWS Serverless Microservices (multi-account/multi-environment): Lambda (JavaScript & Python), API Gateway (REST & GraphQL), DynamoDB, S3, SNS, SQS, Cognito, KMS, CloudWatch, CloudSearch, Amplify; Event-Driven Architecture, Backend-for-Frontend, Node.js, Google Cloud Platform (Firestore), Firebase, WebSockets

CI/CD & Tooling: GitHub Actions, EAS, Bitrise, Jenkins, Docker, Kubernetes, pnpm/Turborepo (monorepo), OTA Updates/CodePush, JIRA; npm package authoring, semantic versioning

Testing, Security & Observability: Jest, Detox, Appium, Datadog, New Relic; Secure Storage (Keychain/Keystore), Biometrics, SSL Pinning

Languages Spoken: Spanish (Native), English (Advanced), Italian (Fluent), French (Basic), German (Basic)
