SUMMARY OF QUALIFICATIONS

- Senior Software Engineer with 8+ years building production React Native, TypeScript, and AWS serverless software, with native Swift and Kotlin modules, across five industries, five countries, and four languages.
- Delivers at scale: 1,350,000+ orders a month for 1,500+ field sellers on unreliable connections, millions of NFL+ viewers on mobile, web, and smart TVs, and secure banking workflows for 100,000+ users.
- Proposes and implements serverless AWS services and offline-first mobile clients, refining designs with a software architect and working alongside product, design, QA, and executives.
- Ships independently and with AI: 13 apps through the App Store and Play Store publishing lifecycle, each built solo with AI in under 4 weeks; 9 open-source npm packages; and a supervised multi-agent ticket-resolution system.

PROFESSIONAL EXPERIENCE

The Coca-Cola Company

Senior Full-Stack Software Engineer

USA

Apr 2025 - Sep 2026

miMarket, a B2B field-sales platform: 1,500+ sellers across Peru, Chile, Argentina, Paraguay, and Brazil place 1,350,000+ orders a month to Coca-Cola clients, on unreliable connections and in three languages.

- Rebuilt the React Native platform into an offline-first architecture on a SQLCipher encrypted SQLite database, sustaining order capture and conflict resolution where connectivity drops.
- Maintained the legacy app alongside the new offline version without interrupting sellers' daily operation, across markets with different conditions and languages.
- Built Swift and Kotlin modules with Expo Modules and Turbo Modules for biometrics, encrypted storage, and hardware.
- Used spec-driven development to configure and operate a multi-agent AI system (Multica.ai, Paperclip.ing) on the Claude Agent SDK that resolved front-end and back-end tickets, each change signed off by the accountable engineer.
- Served as code reviewer and promoted engineering best practices to maintain release quality across five markets.
- Proposed and implemented serverless microservices on AWS (Lambda, API Gateway, DynamoDB, SNS/SQS), refining designs with a software architect to sharpen service boundaries and speed delivery.
- Automated pull requests across multi-account AWS microservices, removing manual release overhead.

NFL+ CTV

Senior Software Engineer

USA

Feb 2024 - Mar 2025

NFL+, the league's streaming service: one React Native and TheoPlayer video player delivered to millions of viewers across mobile, web, and smart TVs, in English, Spanish, and French.

- Migrated legacy React Native CLI native modules to Expo-compatible modules inside a monorepo, simplifying the build and native dependency pipeline.
- Improved playback controls, performance, cross-platform compatibility, and stability across every device target.
- Profiled rendering bottlenecks, then optimized rendering pipelines, asset loading, and JavaScript-to-native bridge traffic to cut startup time and memory consumption.
- Refactored state management from deprecated Recoil to Jotai across the player codebase, retiring an unmaintained dependency from a live streaming product.

Itaú Bank - ITU App

Software Engineer

Chile

Dec 2021 - Feb 2024

ITU, Itaú's digital current-account app: a transaction-critical mobile banking platform serving 100,000+ users in Spanish and Portuguese across the bank's Latin American footprint.

- Engineered biometric authentication and encrypted financial transaction workflows at the app's security layer.
- Sustained 90%+ automated test coverage with Jest and Appium across unit, integration, and end-to-end suites on the SQL-backed codebase, with work tracked in Jira.
- Developed reusable Swift and Kotlin native modules for authentication, secure storage, and core banking features.
- Strengthened Bitrise and Jenkins CI/CD pipelines, reducing deployment risk and improving release consistency.

Platanitos APPs

Full-Stack Software Engineer

Peru

Mar 2019 - Dec 2021

Platanitos, Peru's leading fashion and footwear e-commerce platform, trading across more than one Latin American market.

- Led the migration from a legacy web platform to React Native and Expo, shipping a single codebase to iOS, Android, and Huawei devices.
- Delivered a cross-platform commerce application that surpassed 1,000,000 downloads.
- Implemented end-to-end shopping, payments, product search, push notifications, and authentication with Mercado Pago, Algolia, Firebase, and Firestore on Google Cloud Platform.

Gruppo GPI - NGH Healthcare System

Software Engineer

Italy / Germany

Mar 2018 - Mar 2019

NGH, a healthcare information system: medical reporting and annotation deployed across 3,000+ hospitals and clinics in Europe.

- Built medical reporting and annotation systems for clinical documentation and review.
- Implemented JasperReports document generation, collaborating with cross-functional engineering teams in Italy and Germany.

EDUCATION

TECSUP

Certificate, Software Architecture

Peru

Apr 2025 - Nov 2025

Instituto Tecnológico Trentino Juan Pablo II

Bachelor's Degree, Computer Science

Peru

Mar 2013 - Dec 2015

INDEPENDENT PRODUCTS & OPEN SOURCE

play.google.com/store/apps/developer?id=BinniCordova.com

13 apps, 1,000+ installs/month

apps.apple.com/us/iphone/search?term=BinniCordova.com

Thirteen React Native and Expo apps for iOS and Android (several also on web), each built alone with Claude Sonnet 5.5, Opus 5.5, and OpenAI Terra; releases automated with CI/CD and EAS over-the-air updates.

npmjs.com/~binnizenobiocordovaleandro

9 packages, MIT, 1,600+ downloads in 30 days

- **react-native-check-biometric-changed** - Detects changed biometric enrolment on iOS and Android so an app can revoke a session before a new face or fingerprint inherits it. Swift and Kotlin, zero dependencies; 1,900+ downloads.
- **expo-go-boilerplate** - Starter for Expo and React Native apps with Expo Router, Jotai, Storybook, Jest, Biome, EAS builds and updates, and built-in AI agent skills. One codebase for iOS, Android, web, and TV.
- **expo-atoms** - Atomic state management for Expo and React Native: primitive and derived atoms, no Provider, zero dependencies.
- **expo-feedback-ai** - In-app feature-request board for Expo apps: users vote and an AI agent builds the top idea.
- **expo-orbs** - Loading indicators for AI and agent UIs in Expo: pure TypeScript, Jotai state, ships over EAS Update.
- **expo-logs** - File logger for Expo apps: rotating logs, error capture, and one-call sharing.
- **Also published:** expo-useanimations (79 animated icons), iphone-duo-expo-rn (frosted-glass fold effect).

SKILLS

Mobile & Front-End: Expo (managed and bare), React Native, Expo Modules, Turbo Modules, react-native-vision-camera frame processors, offline-first, SQLCipher SQLite; state management with Redux, Zustand, Jotai, Recoil

Programming Languages: TypeScript, JavaScript, Swift, Kotlin, SQL

Cloud & Back-End: AWS (Lambda, API Gateway with REST and GraphQL, DynamoDB, S3, SNS, SQS, Cognito, KMS, CloudWatch); serverless, multi-account microservices; Node.js; Google Cloud Platform (Firestore); Firebase; WebSockets

AI & Agentic Engineering: Claude Code, Claude Sonnet 5.5, Claude Opus 5.5, OpenAI Terra, Claude Agent SDK, multi-agent orchestration, prompt engineering, spec-driven development, Multica.ai, Paperclip.ing, LangChain, LangGraph, LLM integration, on-device AI (TensorFlow Lite)

DevOps & CI/CD: GitHub Actions, EAS Update (over-the-air releases), CI/CD, Bitrise, Jenkins, pnpm, semantic versioning

Testing, Security & Observability: Jest, Appium; secure storage (Keychain/Keystore), biometrics

Practices: Agile delivery, Jira, design reviews, code review, best practices, documentation

Languages: Spanish (Native), English (Advanced), Italian (Fluent), French (Basic), German (Basic)
